

THE “EAGLE” PRO PACK - \$2895 + Freight

The Pro pack is our top of the range value packed model, there is nothing on the market that will give you more. We have left nothing out to help you achieve results, with super fast Remotes, high tech Smart electronics, Cow/Flag training for position, operate anywhere, full diagnostics on screen to fault find and service on the ranch.

INCLUDES ALL THE NON PRO COCKATOO FEATURES PLUS:

- WAZZ-A-COW CONTROL BOX (with external 4” pulley & carry handle)
- 400 FT OF 1/8 INCH ROPE (all weather 16 plait yacht braid)
- 10 SPEED HEAVY DUTY MOTOR (3 year warranty)
- SUPER LIGHT DIGITAL FINGER TIP REMOTE (Instant stop, Fwd/Rev, 10 speeds)
- RAMPING (4 step speed increase up or down)
- CUSTOM MADE WHISPER QUIET IDLE PULLEY (For opposite end)
- TRAINING FLAG, BLACK WITH WHITE TIMING MARKS (For position on a cow)
- DUAL POWER SYSTEM (12 volt, Bonus 110 - 240 volt AC adapter included)
- PRO MOUNT SYSTEM - (fully adjustable stainless mounting system)
- SPEED BUMP - (change the speed while your Cow / Flag is moving)
- FULLY PROGRAMMABLE - (record up to 4 different hands free runs)
- SOLAR CHARGER - (free cow power from the sun)
- COW/FLAG - (our unique head turning Cow/Flag with timing marks)
- BONUS SPARE REMOTE - (don't be caught out with a lost remote)

FEATURES INCLUDE:

- OUR CONTROL BOX - fitted with a convenient carry handle the outback is a real “Cow to Go” it is lightweight and can be set up anywhere, genuine heavy duty 12 volt training system with all the essential tools to help you achieve success.
- OUR ROPE - 16 plait yacht braid, this proven all weather rope is designed to withstand Mother Nature at her worst - high winds - heavy rains - dusty storms and icy snow!
- OUR MOTOR - whisper quiet heavy duty handmade motor is the heart of our Cow, nothing off the shelf here! We make our barrels, we magnetize our magnets, we hand wind our armatures and we balance the end product like a racing team checks their engine.
- OUR DIGITAL FINGER TIP REMOTE - we have come so far with this technology, we have strengthened our signal by using our own software, no expensive bulky wrist mounted remotes here. We supply a super lightweight inexpensive high tech digital remote designed to handle the extreme conditions. We've even raised the buttons making easy selection when you are busy with your reins or gloved up in winter.
- OUR RAMPING CONTROL - this allows you a 1-4 gradual speed increase across the pen when you press left or right on the remote, and will operate at any of the 10 speeds. You have the option of 1-4 start and 1-4 finish, so you may set ramping up, with a instant stop, ramping both (soft start and finish) or simply turn it off and have our super quick start and stop.

THE "EAGLE" PRO PACK (cont.)

FEATURES INCLUDE:

- OUR CUSTOM IDLE PULLEY - we've designed the pulley to be whisper quiet by fitting a sealed roller bearing, we don't want any anticipation of direction change from the remote.
- OUR TRAINING FLAG - we've all seen one of these, however without our timing marks for position on a Cow we're all just chasing a bag. The white timing marks are positioned at the extreme ends of our flag so you and your horse can accurately position yourself to stop and more importantly depart correctly with as little anticipation as possible. Not to quote anyone famous however - "We need a start.....and a finish" to build trust.
- OUR DUAL POWER - we have always been a 12 volt Cow and always will be 100% safe and reliable, and more importantly you never have to send your Cow back for repair! Our system allows total servicing on the ranch with a complete diagnostic display screen inside our controller, we'll have you up and running in no time. We supply an independent waterproof AC adapter which allows you to run our Cow on any power supply available (110 - 240 volt) and our 12 volt hook up will run all day on a regular battery, no deep cycle battery or inverter needed here.
- OUR PRO MOUNT SYSTEM - we have designed a totally new way to mount the control box, by using marine grade stainless steel which is laser cut, then rolled and shaped to be fully adjustable to fit almost any training pen.
- OUR SPEED BUMP - another great tool in your pen, (exclusive to Wazz-a-Cow) with this feature you may increase the speed of your Cow/Flag at your finger tips while it's moving. Unlike other Dual speed systems we have the option to set the Speed Bump at 10-20 or 30 % increase, Speed Bump works right across the speeds available at your finger tip remote - for example, use the remote buttons to set your Cow/Flag speed at 5, then as you travel across the pen, simply roll your thumb on the remote to activate the speed bump, (speed increases 10-20 or 30%) then when your Cow/Flag stops, your back to the remote speed setting of 5.
- OUR FULLY PROGRAMMABLE MODEL - we all become busy with the reins and don't have the timing of the Pros, with this in mind the Eagle has 4 recordable runs for hands free operation. This allows you to keep your hands on the reins and your horse on the job, record, play, pause and repeat. Record up to 100 moves for each program, however 20 moves, long and short are more than enough with the repeat function, or simply select another stored program, all at your finger tips.
- OUR SOLAR CHARGER - Free cow power from the sun, if your pen has no power or just for safety reasons, running our Cow off a small 12 volt battery and solar charger is a perfect solution for your 'Cow to go'. Thanks to our handmade high torque low draw motors, your Cow will run all day long.
- OUR COW / FLAG - we've all seen one of these, however we like to think we're a little different, the legs are gone and replaced with white timing marks at the rump and shoulder for position on a Cow. The head turning action allows for a better draw and a better turn around for your horse to track. Thank you for your time, we know it's valuable, contact details below.
