

THE “OUTBACK” STARTER PACK - \$1895 + Freight

The ideal starter pack to meet the highest standard of workmanship, the Outback is designed for the serious player with proven reliability in the harsh Outback. Time and time again we find too many gadgets which are only sales gimmicks and not real tools for the job at hand.

INCLUDES:

- WAZZ-A-COW CONTROL BOX (with external 4” pulley & carry handle)
- 120 METRES OF 4MM ROPE (all weather 16 plait yacht braid)
- 10 SPEED HEAVY DUTY MOTOR (3 year warranty)
- SUPER LIGHT DIGITAL FINGER TIP REMOTE (Instant stop, Fwd/Rev, 10 speeds)
- RAMPING (4 step speed increase up or down)
- CUSTOM MADE WHISPER QUIET IDLE PULLEY (For opposite end)
- TRAINING FLAG, BLACK WITH WHITE TIMING MARKS (For position on a cow)
- DUAL POWER SYSTEM (12 volt power lead - Optional 240 volt AC Adapter available)

FEATURES INCLUDE:

- OUR CONTROL BOX - fitted with a convenient carry handle the outback is a real “Cow to Go” it is lightweight and can be set up anywhere, genuine heavy duty 12 volt training system with all the essential tools to help you achieve success.
- OUR ROPE - 16 plait yacht braid, this proven all weather rope is designed to withstand Mother Nature at her worst - high winds - heavy rains - dusty storms and icy snow!
- OUR MOTOR - whisper quiet heavy duty handmade motor is the heart of our Cow, nothing off the shelf here! We make our barrels, we magnetize our magnets, we hand wind our armatures and we balance the end product like a racing team checks their engine.
- OUR DIGITAL FINGER TIP REMOTE - we have come so far with this technology, we have strengthened our signal by using our own software, no expensive bulky wrist mounted remotes here. We supply a super lightweight inexpensive high tech digital remote designed to handle the extreme conditions. We’ve even raised the buttons making easy selection when you are busy with your reins or gloved up in winter.
- OUR RAMPING CONTROL - this allows you a 1-4 gradual speed increase across the pen when you press left or right on the remote, and will operate at any of the 10 speeds. You have the option of 1-4 start and 1-4 finish, so you may set ramping up, with a instant stop, ramping both (soft start and finish) or simply turn it off and have our super quick start and stop.
- OUR CUSTOM IDLE PULLEY - we’ve designed the pulley to be whisper quiet by fitting a sealed roller bearing, we don’t want any anticipation of direction change from the remote.
- OUR TRAINING FLAG - we’ve all seen one of these, however without our timing marks for position on a Cow we’re all just chasing a bag. The white timing marks are positioned at the extreme ends of our flag so you and your horse can accurately position yourself to stop and more importantly depart correctly with as little anticipation as possible. Not to quote anyone famous however - “We need a start.....and a finish” to build trust.

THE “OUTBACK” STARTER PACK (cont.)

FEATURES INCLUDE:

- **OUR DUAL POWER** - we have always been a 12 volt Cow and always will be 100% safe and reliable, and more importantly you never have to send your Cow back for repair! Our system allows total servicing on the ranch with a complete diagnostic display screen inside our controller, we'll have you up and running in no time. We have an optional independent AC adapter available which allows you to supply an independent waterproof AC adapter which allows you to run our Cow on any power supply available (110 - 240 volt) and our 12 volt hook up will run all day on a regular battery, no deep cycle battery or inverter needed here. Thank you for your time, we know it's valuable, contact details below.
